## **Performance Evaluation of Sonoma County Agricultural Commissioner Pesticide Use Enforcement Program**

This report provides a performance evaluation of Sonoma County Agricultural Commissioner's (CAC's) pesticide use enforcement (PUE) program for the fiscal year (FY) 2006-2007. The assessment evaluates the performance of goals identified in the CAC's enforcement work plan as well as the program's adherence to Department of Pesticide Regulation (DPR) standards as described in the Pesticide Use Enforcement Standards Compendium.

### **I. Summary Report of Core Program Elements**

#### **A) Restricted Materials Permitting:**

The restricted materials permitting program element was found to meet DPR standards and work plan goals.

#### **B) Compliance Monitoring:**

The compliance monitoring program element was found to meet DPR standards and work plan goals.

#### **C) Enforcement Response:**

The enforcement response program element was found to meet DPR standards and work plan goals.

### **Summary Statement:**

Sonoma CAC's pesticide use program is currently effective.

### **II. Assessment of Core Program Effectiveness and Work Plan Goals**

#### **A) Restricted Materials Permitting:**

##### **1) Permit Issuance**

The Sonoma CAC permit issuance procedures and performance were evaluated through observation and interviews of relevant staff and found to conform to DPR standards and expectations. Fourteen biologists that issue permits possess Pesticide Regulation and Investigation and Environmental Monitoring licenses. One biologist has just the Pesticide Regulation license. The DPR evaluation determined that permits are:

- Issued only to qualified applicants;
- Signed by authorized persons;
- Issued for time periods allowed by law; and that
- Permit amendments follow approved procedures.

##### **2) Site Evaluation**

The Sonoma CAC site evaluation procedures were evaluated through observation, record review, and interviews of relevant staff and found to conform to DPR

standards and expectations. The CAC issued 232 agricultural permits and 8 nonagricultural permits during FY 2006/2007. The permits:

- Contained the necessary information;
- Identified treatment areas and sensitive areas that could be adversely impacted by the permitted uses; and
- Identified mitigation measures and included conditions that addressed known hazards.

The CAC staff adequately evaluated permits and determined if the use of feasible alternatives was required. They reviewed almost all Notices of Intent (NOIs) in a timely manner and adequately monitored agricultural and nonagricultural permits utilizing pre-application site evaluations and use monitoring inspections.

## **B) Compliance Monitoring:**

### **1) Inspections**

The Sonoma CAC permit inspection procedures and performance were evaluated through DPR oversight inspections and record review and found to conform to DPR standards and expectations. Fourteen biologists that possess Pesticide Regulation and Investigation and Environmental Monitoring licenses perform inspections. Inspections are performed according to the inspection strategy documented in the CAC's enforcement work plan. Inspections are performed according to DPR policies and procedures and inspection reports are complete and comprehensive. The inspections adequately provide the information necessary to successfully prosecute violations.

Inspections performed by the CAC were found to:

- Adequately address label, law and regulatory requirements;
- Include interviews of employers and employees as appropriate;
- Adequately document violations; and
- Include appropriate follow-up inspections and procedures.

### **2) Investigations**

The Sonoma CAC investigation procedures and performance were evaluated through observation, record review, and interviews of relevant staff and found to conform to DPR standards and expectations. The CAC investigates all complaints and complete their reports in a timely manner. The CAC refers and/or notifies DPR and other agencies as required.

Investigations are thorough and complete and submitted on approved forms and in the approved format. The investigations document violations and the CAC collects evidence according to DPR standards. The investigations adequately provide the information necessary to successfully prosecute violations.

## **C) Enforcement Response:**

The Sonoma CAC enforcement response was evaluated through observation, record review, and interviews of relevant staff and found to conform to DPR standards and expectations. The CAC's enforcement program was found to:

- Initiate the appropriate action when violations are identified;
- Sufficiently support compliance, enforcement and public protection actions;
- Ensure that due process requirements are met when taking an enforcement or permit action or when initiating a private applicator certification or registration refusal/revocation.

The CAC levies fines in the appropriate category, adheres to statutory time frames and follows DPR policies when imposing civil penalties on employees.

### **III. Recommended Corrective Actions**

No corrective actions are currently needed.

### **IV. Non-Core and Desirable Activities**

#### **Outreach and Training**

The Sonoma CAC's office performed 27 continuing education seminars for industry employees on pesticide laws and regulations and worker safety. The CAC also provides outreach materials on compliance with pesticide laws and regulations and worker safety to restricted material permittees.
